

### EXERCISES 10.2

Use the value of  $\pi$  from your calculator or  $\pi \approx 3.1416$  to compute the perimeter or circumference to the nearest millimeter and the area to the nearest square millimeter of each figure in exercises 13 to 18. Then determine each area to the nearest .01 square centimeter. (Hint: In some cases the Pythagorean theorem will be needed to find the length of a side or hypotenuse of a right triangle, see section 6.4.)

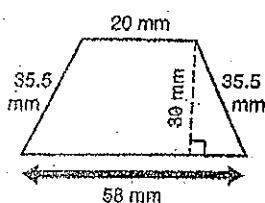

13. a. Rectangle

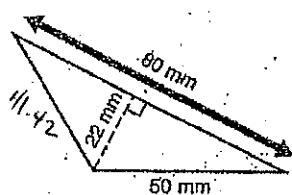

b. Parallelogram

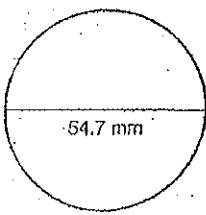

14. a. Trapezoid

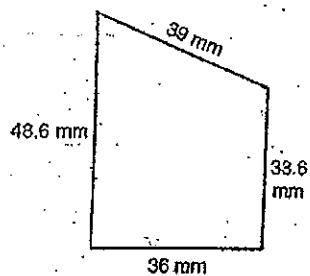

b. Scalene triangle

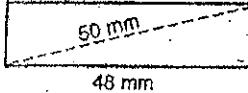

15. a. Circle

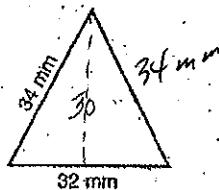

b. Trapezoid

18. a. Rectangle

b. Isosceles triangle

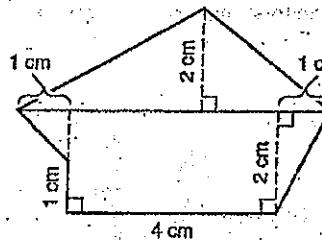

$$\#19 \text{ area} = 15\frac{1}{2} \text{ cm}^2$$

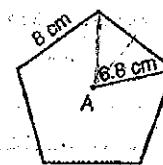

$$\#20 \text{ area} \approx 110 \text{ cm}^2$$

The area of a polygon can be found by subdividing it into smaller regions. Use this principle to find the area of the polygons in exercises 19 and 20 to the nearest .1 square centimeter.

19.

20. Regular pentagon with center A

### Solutions

$$(13a) \text{ perimeter} = 160 \text{ mm} \\ \text{area} \approx 13.75 \text{ cm}^2$$

$$(13b) \text{ perimeter} = 183 \text{ mm} \\ \text{area} = 18 \text{ cm}^2$$

$$(14a) \text{ perimeter} \approx 149 \text{ mm} \\ \text{area} = 1170 \text{ mm}^2 = 11.70 \text{ cm}^2$$

$$(14b) \text{ perimeter} \approx 171.42 \text{ mm} \\ \text{area} \approx 880 \text{ mm}^2 = 8.8 \text{ cm}^2$$

$$(15a) \text{ Circumference} \approx 172 \text{ mm} \\ \text{area} \approx 2350 \text{ mm}^2 = 23.50 \text{ cm}^2$$

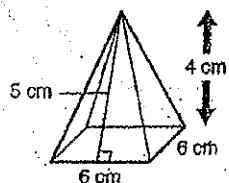

$$(18a) \text{ perimeter} = 124 \text{ mm} \\ \text{area} = 672 \text{ mm}^2 = 6.72 \text{ cm}^2$$

$$(18b) \text{ perimeter} = 100 \text{ mm} \\ \text{area} = 480 \text{ mm}^2 = 4.8 \text{ cm}^2$$

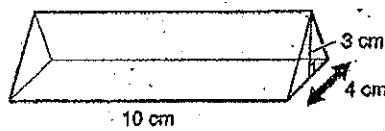

## EXERCISES 10.3

Compute the volumes of the figures in 7 through 12 to the nearest cubic centimeter, and compute their surface areas to the nearest square centimeter.

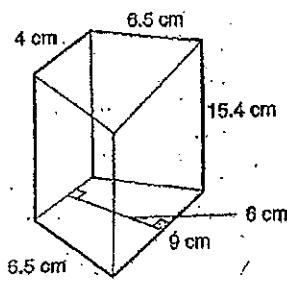

7. a. Square pyramid.

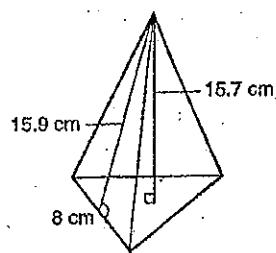

b. Triangular isosceles prism

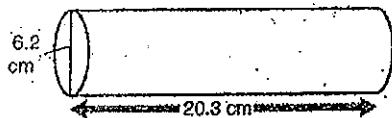

11. a. Trapezoidal prism

b. Equilateral triangular pyramid

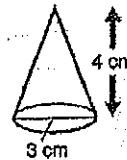

12. a. Cylinder

Compute the volumes to the nearest .1 cubic centimeter for the figures in exercises 13 and 14.

13. a. Cone

Solutions

$$7a) V = 48 \text{ cm}^3$$

$$SA = 96 \text{ cm}^2$$

$$7b) V = 60 \text{ cm}^3$$

$$SA = 124 \text{ cm}^2$$

$$11a) V \approx 601 \text{ cm}^3$$

$$SA \approx 478 \text{ cm}^2$$

$$11b) V = 144 \text{ cm}^3$$

$$SA \approx 218 \text{ cm}^2$$

$$12a) V \approx 612.6 \text{ cm}^3$$

$$SA \approx 455.6 \text{ cm}^2$$

$$13a) V \approx 9.5 \text{ cm}^3$$
