

## Relations – Properties & Examples

Suppose  $C = C_1 \cup C_2$  where

$C_1 = \{\text{all the children of Amy and Bob}\} = \{\text{Carl}(\quad), \text{Dick}(\quad), \text{Ellen}(\quad), \text{Frank}(\quad), \text{Ginger}(\quad)\}$

$C_2 = \{\text{all the children of Helen and Ivan}\} = \{\text{Jane}(\quad), \text{Ken}(\quad)\}$

We define the relations  $B$  and  $S$  on  $C \times C$  as follows:

$x B y$  iff  $x \neq y$  and  $x$  is the brother of  $y$

$x S y$  iff  $x$  and  $y$  have the same pair of parents

1. Place an “x” in the cell in row  $p$ , column  $q$  if  $p B q$ .

B	Carl	Dick	Ellen	Frank	Ginger	Jane	Ken
Carl							
Dick							
Ellen							
Frank							
Ginger							
Jane							
Ken							

2. Place an “x” in the cell in row  $p$ , column  $q$  if  $p S q$ .

S	Carl	Dick	Ellen	Frank	Ginger	Jane	Ken
Carl							
Dick							
Ellen							
Frank							
Ginger							
Jane							
Ken							

3. Determine the truth-value of each statement.

a.  $\forall c_1 \in C, c_1 B c_1$

d.  $\forall c_1 \in C, c_1 S c_1$

b.  $\forall c_1, c_2 \in C, \text{if } c_1 B c_2 \text{ then } c_2 B c_1$

e.  $\forall c_1, c_2 \in C, \text{if } c_1 S c_2 \text{ then } c_2 S c_1$

c.  $\forall c_1, c_2, c_3 \in C, \text{if } c_1 B c_2 \text{ and } c_2 B c_3, \text{ then } c_1 B c_3.$

f.  $\forall c_1, c_2, c_3 \in C, \text{if } c_1 S c_2 \text{ and } c_2 S c_3, \text{ then } c_1 S c_3.$

4. a. List the elements in  $\{q \in C : \text{Carl } S q\}$ .

b. List the elements in  $\{q \in C : \text{Jane } S q\}$ .
