___________________________________________________________________________

3. Use the divisibility rule for 3 to color all the cells of Pascal’s Triangle that contain a multiple of 3 the same color. Using a different color, shade all the cells of Pascal’s Triangle that contain a number 1 less than a multiple of 3. With yet a different color, fill in all the cells of Pascal’s Triangle that contain a number 2 less than a multiple of 3.

Describe the result.
