

SPRING 2021 | CHANGING CLIMATE, CHANGING WORLD LECTURE SERIES

CLIMATE TO COVID: SEEING THE SYNDEMIC

January 25-May 3, 2021

Mondays, 7-8:30 p.m.

REMOTE COURSE

Sponsored by the Fulton School of Liberal Arts

Rapid environmental change, pandemic infectious disease, obesity, and undernutrition are co-occurring problems that may be understood as a “syndemic” because of their global reach and the common factors that drive them. The interconnected roots and impacts of this syndemic are increasingly evident through the health and socioeconomic disparities amplified by COVID-19 across diverse populations. The course will explore causes and solutions to the syndemic from various disciplinary perspectives and levels of analysis through lectures and discussions with experts from within and outside the Salisbury University community.

■ **Register for IDIS 205-750: One Credit, Pass/Fail (no prerequisites)**

■ **Also open to the community!**

Although lectures connect, each lecture stands on its own; no prior attendance is required

■ **For more information or public access:**
