# MARYLAND—DISTRICT OF COLUMBIA— VIRGINIA SECTION OF THE MAA NEWSLETTER

# MARYLAND - DISTRICT OF COLUMBIA VIRGINA SECTION OF THE MAA NEWSLETTER

VOL. 10, NO. 1 EDITOR: MARY KAY ABBEY August 1988

Notes from the Chair

This newsletter should reach you just as you return for the Fall semester. We hope that you will put two sets of dates on your calendar now. The Fall section meeting will be November 11 and 12 at American University in Northwest Washington, D. C. Professor I. Lok Chang has worked very hard preparing for this meeting. Details for the banquet, luncheon, and hotel accomodations can be found elsewhere in this newsletter.

Helen Christensen has done a marvelous job lining up our three main speakers. Our Friday evening speaker will be Paul Halmos. A typical comment from another section is, "If you are lucky enough to get him to agree to speak, let him speak about anything he wants." Frederic Rickey will conduct a three hour minicourse on Friday afternoon dealing with the incorporation of the history of calculus into the calculus classroom. This is a chance for us to learn ways to liven up our lectures. Arthur Benjamin, the Saturday speaker, promises to give us a lively presentation. People who have heard him talk tell us that it is truly amazing.

The other date that you should reserve is Saturday, April 22, 1989, for the Spring meeting. We will convene at Tidewater Community College in Virginia Beach. Late April should be a great time to be at the beach. For those of you at two year schools, VMATYC is planning their meeting for Friday, April 21, so that joint members can attend both. We will also have some joint sessions on Saturday. They are planning a banquet for Friday evening and any MAA member is welcome. More details on this meeting will follow in the Spring newsletter; however, now is the time to get both of these meetings on your calendar and to request funding from your school.

The MAA is now in the process of establishing student chapters at colleges and universities across the country. The purpose of these chapters is to attract students to careers in mathematics and to encourage membership in the MAA. Each member of a student chapter will automatically become a member of the MAA section to which the

institution belongs. Dues will be quite low -- \$10 per year per member plus \$5 for either the <u>College Mathematics Journal</u> or <u>Mathematics Magazine</u> and \$10 for the <u>American Mathematic Monthly</u>. If you are interested in forming a student chapter, information is being sent to your schools directly by the MAA. If for some reason you do not receive the information or you want more details, contact either The Mathematical Association of America, ATTN: Student Chapter Coordinator, 1529 Eighteenth Street, NW Washington, D. C., 20036 or the Chair of the MAA Committee on Student Chapters, Dr. Howard Anton, Department of Mathematics, Drexel University, Philadelphia, PA, 19104.

As a further incentive to students, any student who presents a talk at a section meeting receives a free one year membership in the MAA along with their choice of journal. Encourage your students to give a talk at one of our meetings. It looks good on their resumes, encourages their professional participation in the MAA, and is enjoyable to the rest of us. What better way can you encourage creativity and interest in mathematics? Four students from Gallaudet, Brenda Call, Roy Siskind, Joseph Hartung, and Eric Tomas, received memberships for speaking at the Spring meeting. Their talk was well planned, professionally done, and very interesting. Thank you to their advisor, T. Hoy Booker, for supporting this endeavor.

Our section sent a \$50 check to the Greater MAA Fund in memory of Dorothy Bernstein, who passed away earlier this year. Dr. Bernstein contributed so much to our section, to the MAA in general, and to mathematics. We wished to honor this great lady.

Robb Koether will handle the Membership Incentive Program (MIP) for our section. A form that you may reproduce is included in this newsletter. Remember that for each member that we recruit and send up through Robb, our section will receive \$10.

A thank you goes out to Mount Saint Mary's for hosting our Spring meeting. John August and his colleagues did a wonderful job and made us feel welcome.

Our congratulations to Michael Johnson, a mathematics student at the University of Baltimore, who was our section's high scorer on the Putnam.

I hope that all of you have a great Fall semester and that I will see you at the upcoming meetings. If you have any suggestions or comments, please feel free to give me or any of the officiers a call or write a letter.

The addresses and phone numbers can be found at the end of the newsletter.

Elizabeth J. Teles

## Fall Meeting November 11 & 12, 1988

The American University is located in the northwest region of Washington, D.C., about 7 miles from the U.S. Capitol. The Tenleytown Metro subway station is just 1 mile from the campus. A university shuttle bus stops near the 40th Street Metro exit at Tenleytown every 15 to 20 minutes. The ride time on the subway from the hotels included in the newsletter is about 10 minutes. More details will be in the next newsletter.

## Lodgings - Hotels

A block of rooms has been reserved at the Hyatt Regency at Bethesda for Friday and Saturday nights. The rate is \$69 per room per night. Call 1-301-657-1234 to make reservations. Mention that you are attending the MAA Fall meeting when you call. Space is guaranteed only until October 14 so please make your reservations as soon as possible. The hotel is located at the Bethesda Metro Center, with elevators in the hotel leading to the Bethesda Metro Subway Station.

Following is a list of other hotels that are within seven miles of the American University.

The Bethesda Ramada Inn 1-301-654-1000 Four blocks from Bethesda Metro Station	American Inn of Bethesda 1-301-656-9300 Four blocks from Bethesda Metro Station	Manor Inn Bethesda 1-301-656-2100 Two blocks from Bethesda Metro Station

## **BANQUET AND LUNCHEON DETAILS**

A reception and the MAA Fall Meeting Banquet have been planned for Friday evening at the University Faculty Club. The luncheon on Saturday will also be held there. Reservation for the banquet and/or luncheon must be made with Dr. David A. Schedler. Please use the form at the end of the newsletter. The deadline for reservations is November 3. Be sure to indicate your choice for the entree and circle the other choice you desire for lunch.

## INVITED SPEAKERS

Paul Halmos is a professor of mathematics at Santa Clara University. He has just returned from a year's sabbatical and will send us more information for the next newsletter.

Arthur Benjamin received his BS in Applied Mathematics from Carnegie-Mellon University in 1983 and his MS from Johns Hopkins in 1985. He is currently pursuing his PhD in Mathematical Sciences at Johns Hopkins as an NSF Graduate Fellow, concentrating in combinatorics and operations research. In 1988, he was awarded the Nicholson Prize of the Operations Research Society of American for his research paper "Graphs, Maneuvers, and Turnpikes."

When he is not entertaining audiences of students, educators, and scientists with his rapid calculation skills, he enjoys attending the theatre, playing backgammon, and performing magic.

Frederick Rickey, a professor at Bowling Green State University, will conduct a workshop on the incorporations of the history of calculus in the calculus classroom.

## CALL FOR PAPERS

Contributed papers by MAA members and/or their students will be scheduled Saturday morning before the Business Meeting and again Saturday afternoon. In particular, topics involving computer applications as well as other classroom applications of mathematics are encouraged. Such papers should be approximately 20 minutes in length, to allow for a question/answer period after the talk. In particular circumstances, a speaker may be alloted two consecutive periods if a longer presentation time is required.

Since the Spring 1989, meeting will emphasize both problem-solving approaches in mathematics and student participation in the MAA and its meetings, members are urged to begin this Fall having students plan ahead with projects that could be presented at the Spring meeting.

Abstracts of contibuted papers for the November meeting, as well as specifications for any computer facilities or audio-visual needs, should be sent to:

S. Helen Christensen, RSM
Department of Mathematical Sciences
Loyola College
4501 N. Charles Street
Baltimore, MD, 21210-2699

The deadline is September 16, 1988.

### MATH OLYMPIAD

A team of six American high school students placed sixth in the 29th International Mathematical Olympiad (IMO) held July 15 and 16 in Canberra, Australia, with five of the team members receiving silver medals.

The Americans had a team score of 153 out of a possible 252 Ahead of them were teams from the Soviet Union (217), China and Romania (tied for 2nd with scores of 201), West Germany (174) and Viet Nam (!66). In all, 49 nations and 268 students participated in the Olympiad.

The IMO judges awarded individual first, second and third prizes to deserving team members. Five US team members received second prizes: Jordan Ellenberg of Potoamc, MD, was only one point shy of a gold with 31 out of a possible 42 points.

### CENTERFOLD

Please remove the centerfold and post it on your office door or the department bulletin board. You are free to Xerox it and distribute it to your classes.

#### WANTED

#### STUDENT SPEAKERS

REWARD: One year membership in

MAA and choice of journal

REQUIRED: 20 minute presentation at

section meeting

**DEADLINE:** September 16, 1988

or

February 20, 1989

See your advisor for further information.

## MATHEMATICS EXAMINATIONS

From our section four high schools were on the honor roll. They are South Lakes HS, Reston, VA, Thomas Jefferson HS for Science and Technology, Alexandria, VA, Midlothian HS, Midlothian, VA, and Chantilly HS, Chantilly, VA. They competed against schools from Alabama, Florida, Georgia, North Carolina, Puerto Rico, South Carolina, the Virgin Islands, and some military foreign schools.

Also Takoma Park Intermediate School was the Silver Cup winner in the American Junior High Examination. They were the only school to have two students with perfect papers and ten students with 24 out of 25 points.

## **FUTURE HIGH SCHOOL EXAM DATES**

American Junior High School Mathematics Examination Thursday, December 1, 1988

American High School Mathematics Examination Tuesday, February 18, 1989

American Invitational Mathematics Examination Tuesday, March 21, 1989

United States Mathematical Olympiad Tuesday, April 25, 1989
